AYORMA MILD DAILY SCRUB

Skin-care brand Ayorma recently introduced a product to reduce dark circles, brighten your eyes and rejuvenate the skin under them. The small tube promises to exfoliate dead cells around the delicate eye area. At first, I didn't understand why we needed another product especially for the under-eye area and was also very apprehensive about using a scrub near my eyes. However, it's very mild and did not adversely affect even my super-sensitive skin. While it wasn't too effective in reducing my dark circles, it does brighten the area for a brief amount of time after using it. It feels very refreshing and soothes and relaxes the area near your eyes, especially if you use it at night.
